Presentation Title

Altenando fantasie e realtà, toni leggeri e temi più seri, questo libro vuole essere un omaggio affettuoso al campano argentino; a volte si descrivono le ricette create da Maradona, altre volte le ricette diventano metaphore delle azioni più straordinarie del pibe de oro. I citi di fondovalle con i grali. Le vittorie diventano piatti da sogni. Sullo sfondo le due patre di Diego, Napoli e Buenos Aires, le due città magiche, malinconiche e appassionate, come le tarte che il Diego Armando Maradona.

**Abstract**

Finding, buying, and finally reading a publication is a very personal experience. For most of us this is routine. We go to a bookstore, search for the title we are interested in or perhaps browse the best sellers list, then purchase and start reading the publication.

Now consider you are blind and rely on an assistive technology to read the publication. You wonder: will my screen reader work with this title; are there image descriptions that will be spoken to describe these images; are there page numbers which are accessible; is the reading order correct so I don't hear a "caution" after reading a paragraph which could be dangerous? These are just a few of the accessibility concerns consumers have when trying to purchase and ultimately read a digital publication.
